

CLOUD & MOBILITY SOLUTIONS

UNLIMITED SCALE AND INFINITE POSSIBILITIES

ENABLE YOUR BUSINESS TO DO MORE WITH LESS

The enterprise mobility applications are constantly evolving, needing impromptu and emergency support and top-notch development facilities for various heterogeneous devices and platforms.

In this rapidly changing world of IT, leveraging cloud-hosted services and solutions help you keep pace with the sector you are functioning in and also reduce security and management costs.

Our cloud-based mobility solutions and services can simplify your mobility complexity, lower your IT costs and also achieve:

- Faster time-to-market
- Seamless integration with back-end systems
- Improved insights to make real-time decisions
- Minimize back-end processes
- Access to information when offline

Gerab System Solutions offers cloud solutions in the three areas given below with our strategic partnership and expertise:

Infrastructure as a Service

Cloud-based services, pay-as-you-go for services such as storage, networking and virtualization.

Software as a Service

Hardware and software tools available over the internet on a subscription basis.

Platform as a Service

Software applications that are readily available over the internet on a subscription basis.

With cloud computing, hosting, and off-site infrastructure, you can have access to the technology you need without investing and maintaining expensive tech infrastructure. Bringing your business into the cloud can increase efficiency, cash flow, collaboration, and security.
